

BIOCHAR NAKED

using for composting

STEP 1

Naked Biochar will add a considerable boost to compost, trapping all the nutrients and harbouring a healthier environment for worms, microbes and fungi to grow. One 20 Litre bag of Naked Biochar will treat the compost contained in an average size bin of 220 Litres capacity.

When composting, mix evenly 1 bag (20 Litres) of Naked Biochar with the compost material added to the bin (220 Litres) as it is put in

STEP 2

Sprinkle the Naked Biochar evenly over a layer of brown compost material. Add a sprinkle of water.

Sprinkle the Naked Biochar evenly over a layer of green compost material. Add a sprinkle of water.
